## **Corporate Advisory Board Members**

**Aaron Etra** has a B.A. from Yale, a J.D. from Columbia and an LL.M. from New York University. He is actively engaged in technology transfer and establishing, managing and financing ventures nationally and internationally, Aaron is an attorney who has practiced and taught in London, Malawi, and New York and served with the United Nations in Geneva. He is a director and officer of several US, Dutch, UK and Australian companies, in addition to educational, charitable and cultural organizations.

**Paul Griesgraber's** business experience includes working as an Investment Consultant, in addition to negotiating licensing and sponsorship agreements in Japan, Europe and in the United States. Paul's diverse international studies have focused on Peace Theory and Epistemics at the University of Southern California, The Center of Analysis of Conflict in London, The London School of Economics and University College, London.

**Richard Knowles** was President of Arco Environmental, Inc. and before that, was responsible for Worldwide Drilling for Arco. He is extremely knowledgeable on all things related to oil well technology and processing of crude oil. He is now on the Board of Terralog Technologies, a major down-hole petrowaste disposal company.

**Dan Murray** is the Senior Well Analyst at The Termo Company, a major West Coast independent oil producer. Dan routinely utilizes our technology to focus on down hole waste injection for the purpose of eliminating significant transportation and disposal costs associated with crude bottom waste generated from tank cleaning.

**Doug Williams** is the owner of a number of oil wells in Southern California and is a member of Oil Operators, Inc., comprised of individuals who own the major oil production field in Signal Hills, CA. He exclusively uses our processes for tank cleaning purposes. Doug consults with us on all oil well matters and his was the first well that EarthSonics stimulated.

**David Bernstein** is a Environmental Engineer (REA Environmental Specialist) retired from Valero (previously Ultramar) Refinery in Wilmington California. Valero is the largest refinery in the USA. His refinery is documented as the cleanest in the USA (listed according to Hazardous Waste Data for US Operating Refineries greater than 20 MBPD) and he employs the latest technology in achieving that distinction.

**Jeffery Kissel**, as Chief Financial Officer \$1.5 Billion Earth Tech, Inc. with 125 offices world-wide, has a global view of the Remediation Industry and its financial implications. He is an expert in the formation and maintenance of joint ventures, partnerships and other financing vehicles including both public and private debt and equity placements. Is also responsible for implementation and maintenance of Sarbanes Oxley controls and related initiatives. His background includes engineering and petroleum refining.

**Martin Coper, Ph.D.**, is the head of a consulting firm providing advice on business development, R&D management, and marketing. He is an advisor to US Dept. of Commerce Advanced Technology Program and was Manager, R&D Planning, for OCCIDENTAL PETROLEUM CORP. Dr. Cooper was a physicist at the National Bureau of Standards and Director for Strategic Planning at National Science Foundation. He is the author twenty-plus peer reviewed scientific technical papers
